Liberal Studies

Liberal Studies has been recommended as one of the core subjects.

In order to let teachers getting familiar with the new liberal studies curriculum which shall be providing in the education reform, a NSS Task Group has been formed and is taking a very serious and close look into the new curriculum.

This subject will employ issue-enquiry approach to develop students' multi-perspectives and critical thinking skills. To help teachers get familiar with the rationale of this new subject and be ready to translate appropriate learning and teaching strategies for classroom practices, a curriculum integration and restructuring will be launched in Junior Form Integrated Humanities and the current S1 to S3 Life-wide Learning Education curriculum, in which, new teaching methodologies and skills will be employed.
